

Kenneth (Rick) Cramer

Amherst, VA | k.rick.cramer@gmail.com | (317) 918-7988 | RickCramer.dev

Professional Summary

Analytics Engineer with 8+ years of progressive experience building analytical datasets, data pipelines, business intelligence solutions, and enterprise data products. Deep expertise in SQL, data modeling, ETL/ELT, Python, Power BI, and complex enterprise data across SQL Server, PostgreSQL, and Oracle. Experienced translating business processes and analytical requirements into reliable datasets, reusable metric logic, validation frameworks, and scalable reporting solutions. Primary architect and engineer of **Nessie**, an automated analytics and data-quality platform supporting financial, operational, project-performance, compliance, and diagnostic use cases.

Core Technical Skills

- | | |
|---|---|
| • SQL (SQL Server, PostgreSQL, Oracle) | • Python (Data Processing & Automation) |
| • Analytics Engineering & Data Modeling | • ETL / ELT Pipeline Development |
| • Business Intelligence & Analytics | • Power BI & DAX |
| • Data Quality & Reconciliation | • Query Optimization & Performance Tuning |
| • Analytics-Ready Data Products | • REST APIs & System Integration |
-

Professional Experience

Senior Technical Consultant (Data Platform & Analytics Engineering)

Unanet - Dulles, VA (Remote)

April 2023 – August 2026

- Designed scalable **ETL pipelines, relational data models, and analytics-ready datasets** supporting financial, operational, project-performance, and compliance use cases.
- Built and optimized complex analytical and transformation logic across **SQL Server and PostgreSQL**, including SQL solutions exceeding **7,500 lines**.
- Analyzed large enterprise datasets to identify anomalies, reconcile results, investigate data-quality issues, and answer complex business questions.
- Developed reusable datasets, standardized analytical logic, and **Power BI/DAX reporting solutions** supporting dashboards, self-service analytics, and business decision-making.
- Implemented validation, reconciliation, and data-integrity controls to improve accuracy, traceability, and confidence across complex enterprise datasets.
- Partnered with clients and business stakeholders to translate business rules, reporting requirements, and metrics into maintainable analytical solutions.
- Served as primary architect and engineer for **Nessie**, an automated analytics, reporting, diagnostic, and data-quality platform.
- Developed reusable analytics and validation processes to automatically identify anomalies, configuration issues, and implementation issues across client environments.
- Built automation using SQL, Python, PowerShell, and REST APIs, **saving hundreds of consultant hours annually**.
- Served as a technical escalation point for complex analytics, reporting, reconciliation, database, and enterprise-data issues.

Business Data Analyst III

Liberty University - Lynchburg, VA (Remote)

December 2021 – March 2023

- Designed data-processing, integration, and analytical solutions supporting institutional reporting, marketing analytics, and business intelligence.
- Served as **product owner and developer for Centralist**, a PL/SQL- and Python-based marketing data application built on Ellucian Banner.
- Developed and optimized complex **Oracle PL/SQL and SQL** supporting audience segmentation, enterprise data processing, reporting, and analytics.
- Developed reusable reporting logic and standardized metrics to improve consistency and reduce duplicated business logic across institutional reporting.
- Partnered with stakeholders to translate business questions, processes, and reporting requirements into maintainable analytical and technical solutions.

Business Data Analyst II

Liberty University - Lynchburg, VA

November 2019 – November 2021

- Developed SQL-based reporting, extraction, and analytics-ready datasets using Ellucian Banner and other enterprise data sources.
- Standardized reusable reporting logic and business metrics to support operational and leadership decision-making.
- Performed data analysis, discrepancy investigation, validation, reconciliation, query optimization, and performance troubleshooting across relational datasets.

Business Data Analyst I

Liberty University - Lynchburg, VA

June 2018 – October 2019

- Developed SQL reporting, data-extraction, and analytical solutions using Ellucian Banner and related enterprise systems.
- Supported business intelligence and ad-hoc analysis while translating operational questions into useful datasets and reporting outputs.
- Performed data validation, reconciliation, troubleshooting, and technical documentation across Oracle-based enterprise data.

Senior Admissions Counselor

Liberty University - Lynchburg, VA

December 2015 – May 2018

- Analyzed enrollment and performance data using Excel and **Google Analytics** to support reporting and process improvement.
- Developed substantial business-domain knowledge while serving as a departmental data and systems resource.

Admissions Counselor

Liberty University - Lynchburg, VA

September 2013 – November 2015

- Supported data-intensive admissions processes while developing foundational experience in enterprise systems and data quality.

Education | B.S., Liberty University - 2010 (Humanities)
