

Kenneth (Rick) Cramer

Amherst, VA | k.rick.cramer@gmail.com | (317) 918-7988 | RickCramer.dev

Professional Summary

Data Engineer with 8+ years of progressive experience designing data pipelines, relational data models, data integrations, migration workflows, and enterprise data products. Deep expertise in SQL, ETL/ELT, Python, data transformation, and complex enterprise data across SQL Server, PostgreSQL, and Oracle. Experienced reverse-engineering legacy systems, building repeatable and idempotent data processes, integrating REST APIs, and implementing validation and reconciliation controls for business-critical data. Primary architect and engineer of **Nessie**, an automated data-processing, analytics, diagnostic, and data-quality platform supporting complex ERP environments.

Core Technical Skills

- SQL (SQL Server, PostgreSQL, Oracle)
 - Data Engineering & Data Modeling
 - Data Migration & Transformation
 - Data Quality & Reconciliation
 - AWS & Cloud Data Platforms
 - Python (Data Processing & Automation)
 - ETL / ELT Pipeline Development
 - REST APIs & System Integration
 - Query Optimization & Performance Tuning
 - PowerShell & Automation
-

Professional Experience

Senior Technical Consultant (Data Platform & Analytics Engineering)

Unanet - Dulles, VA (Remote)

April 2023 – August 2026

- Designed and maintained **ETL pipelines, transformation workflows, and relational data models** supporting ERP migrations, integrations, customizations, and enterprise reporting.
- Built complex data transformation and migration logic across **SQL Server and PostgreSQL**, including solutions exceeding **7,500 lines of SQL**.
- Reverse-engineered legacy schemas, relationships, application behavior, and business rules to determine reliable target-system mappings and transformation strategies.
- Designed repeatable and **idempotent data-conversion and remediation processes** that could be safely rerun without creating duplicate or unintended changes.
- Implemented validation, reconciliation, and data-integrity controls to identify mapping errors, transformation discrepancies, and production data issues.
- Developed **Python-based REST API integrations** incorporating authentication, dynamic payload generation, JSON processing, response validation, error handling, and logging.
- Processed and transformed financial, project, employee, vendor, purchasing, billing, and operational data across complex enterprise systems.
- Served as primary architect and engineer for **Nessie**, an automated data-processing, analytics, diagnostic, and data-quality platform.
- Built reusable engineering and automation workflows using SQL, Python, PowerShell, and REST APIs, **saving hundreds of consultant hours annually**.
- Served as a technical escalation point for complex migration, integration, database, data-quality, and enterprise-data issues.

Business Data Analyst III

Liberty University - Lynchburg, VA (Remote)

December 2021 – March 2023

- Designed data-processing and integration solutions connecting Ellucian Banner with institutional systems, applications, and reporting processes.
- Served as **product owner and developer for Centralist**, a PL/SQL- and Python-based data application built on Ellucian Banner.
- Developed, optimized, debugged, and maintained complex **Oracle PL/SQL and SQL** supporting enterprise data processing and audience segmentation.
- Analyzed application architecture and business logic to improve reliability, maintainability, performance, and data quality.
- Contributed to reusable libraries, shared development practices, and technical documentation supporting maintainable data-processing workflows.
- Partnered with analysts, developers, and business stakeholders to translate enterprise processes and requirements into maintainable technical solutions.

Business Data Analyst II

Liberty University - Lynchburg, VA

November 2019 – November 2021

- Developed SQL-based data extraction, transformation, and reporting solutions using Ellucian Banner and other enterprise data sources.
- Built reusable datasets and shared SQL logic while working with enterprise data integration and virtualization technologies.
- Performed data validation, reconciliation, discrepancy investigation, query optimization, and performance troubleshooting across relational datasets.

Business Data Analyst I

Liberty University - Lynchburg, VA

June 2018 – October 2019

- Developed SQL-based data extraction and reporting solutions using Ellucian Banner and related enterprise systems.
- Worked with Oracle-based enterprise data to investigate business requirements, data relationships, and discrepancies.
- Performed data validation, reconciliation, troubleshooting, query development, and technical documentation.

Senior Admissions Counselor

Liberty University - Lynchburg, VA

December 2015 – May 2018

- Worked extensively with Ellucian Banner while analyzing and maintaining enrollment data across complex enterprise business processes.
- Developed substantial business-domain and enterprise-system expertise while serving as a departmental data and systems resource.

Admissions Counselor

Liberty University - Lynchburg, VA

September 2013 – November 2015

- Developed foundational experience with Ellucian Banner, enterprise data workflows, data validation, and business processes.

Education | B.S., Liberty University - 2010 (Humanities)
