

Kenneth (Rick) Cramer

Amherst, VA | k.rick.cramer@gmail.com | (317) 918-7988 | RickCramer.dev

Professional Summary

Data Integration Engineer and Senior Technical Consultant with 8+ years of progressive experience delivering enterprise data migrations, integrations, conversions, and technical solutions across complex ERP environments. Deep expertise in SQL, Python, REST APIs, data mapping, transformation, validation, and reconciliation across SQL Server, PostgreSQL, and Oracle. Experienced reverse-engineering legacy systems and business processes, translating client requirements into reliable integration and migration solutions, and troubleshooting complex financial, project, and operational data. Strong background bridging technical and business teams to design maintainable, repeatable solutions for enterprise data movement, system interoperability, and data quality.

Core Technical Skills

- Data Integration & ERP Migration
 - Data Conversion & Transformation
 - REST APIs & JSON Integration
 - Data Quality & Reconciliation
 - ETL / ELT Pipeline Development
 - SQL (SQL Server, PostgreSQL, Oracle)
 - Python & PowerShell Automation
 - Data Mapping & Legacy-System Analysis
 - Query Optimization & Performance Tuning
 - Financial & Project Accounting Data
-

Professional Experience

Senior Technical Consultant (Data Platform & Analytics Engineering)

Unanet - Dulles, VA (Remote)

April 2023 – August 2026

- Designed and delivered **ERP migration, data-conversion, integration, and transformation workflows** across complex client environments.
- Built sophisticated transformation and migration logic across **SQL Server and PostgreSQL**, including solutions exceeding **7,500 lines of SQL**.
- Reverse-engineered undocumented legacy schemas, application behavior, relationships, and business rules to determine reliable mappings into target ERP structures.
- Designed repeatable and **idempotent migration and remediation processes** that could be safely rerun while preserving data integrity and preventing unintended duplication.
- Transformed and reconciled financial, project, employee, vendor, purchasing, billing, and operational data across heterogeneous enterprise systems.
- Developed **Python-based REST API integrations** incorporating authentication, dynamic payload generation, JSON processing, response validation, error handling, and auditable logging.
- Implemented validation and reconciliation controls to identify mapping errors, transformation discrepancies, configuration issues, and production data problems.
- Partnered directly with clients, consultants, and developers to translate business processes, legacy-system behavior, and implementation requirements into maintainable technical solutions.
- Served as a technical escalation point for complex migration, integration, customization, database, reporting, and enterprise-data issues.

Business Data Analyst III

Liberty University - Lynchburg, VA (Remote)

December 2021 – March 2023

- Designed data-processing and integration solutions connecting **Ellucian Banner** with institutional applications, systems, and reporting processes.
- Served as **product owner and developer for Centralist**, a PL/SQL- and Python-based enterprise data application built on Ellucian Banner.
- Developed, optimized, debugged, and maintained complex **Oracle PL/SQL and SQL** supporting enterprise data processing and audience segmentation.
- Analyzed application architecture, business rules, and data flows to improve reliability, maintainability, performance, and data quality.
- Contributed to reusable libraries, shared development practices, and technical documentation supporting maintainable integration and data-processing workflows.
- Served as a technical liaison between business stakeholders, analysts, developers, and other technical teams.

Business Data Analyst II

Liberty University - Lynchburg, VA

November 2019 – November 2021

- Developed SQL-based data extraction, transformation, reporting, and integration solutions using Ellucian Banner and other enterprise data sources.
- Built reusable datasets and shared SQL logic while working with enterprise data integration and virtualization technologies.
- Performed data validation, reconciliation, discrepancy investigation, query optimization, and troubleshooting across enterprise relational datasets.

Business Data Analyst I

Liberty University - Lynchburg, VA

June 2018 – October 2019

- Developed SQL-based data extraction and reporting solutions using Ellucian Banner and related enterprise systems.
- Investigated business requirements, data relationships, system behavior, and discrepancies within an Oracle-based enterprise environment.
- Performed data validation, reconciliation, troubleshooting, SQL development, and technical documentation.

Senior Admissions Counselor

Liberty University - Lynchburg, VA

December 2015 – May 2018

- Worked extensively with **Ellucian Banner** across admissions, enrollment, financial-aid, and student-related business processes.
- Developed deep functional and business-domain expertise while serving as a departmental data and systems resource.

Admissions Counselor

Liberty University - Lynchburg, VA

September 2013 – November 2015

- Developed foundational expertise in Ellucian Banner, enterprise workflows, data validation, and admissions and enrollment business processes.

Education | B.S., Liberty University - 2010 (Humanities)
